

SANSKRITI

University, Mathura

For Excellence
in Life

▪ How Sanskriti University is different from other Universities?

Sanskriti set up in a serene environment with state of the art infrastructure, is a university providing 360 degree holistic development of students. Sanskriti's intellectual capital comprises highly qualified and experienced faculty drawn from Industry as well as from Academia. Curriculum aligned with industry needs, makes students employable and job ready. Large number of courses is being offered by the university to satisfy the needs of the students who want to pursue higher education in main streams and also for those who want to build their careers in unconventional streams that have great potential and importance in the industry, Sanskriti University offers wide variety of courses spread across various disciplines and each discipline having a dedicated college. Sanskriti grooms into a perfect leader and a perfection in your stream. The students are admitted on selective basis. In short, the major contributing factors of higher education are given due weight age to ensure progressive enhancement of brand image and fulfillment of the university's mission of serving the society through high quality education in different branches of higher studies.

▪ What about faculties?

We need a National Mission to get people to Teach. If countries can have compulsory national service to serve in the armed forces, why can't we have a year-long national service of teaching for everyone who goes to college? Technology can only help educate the already educated. We will still need live teachers in the classroom if we have to give our children their due on education.

Teachers today must not only be well prepared to impart a quality education but also be sensitive to meeting the needs of their students regardless of their race, color, creed, or national origin. It is important for the teacher to understand, believe, and practice the ideas of teacher efficacy, intentionality, educational psychology and pedagogy. An effective teacher should take into account the intellectual, social and cultural characteristics of each student being taught. Taking cognizant of the fact that each child is different and has different learning styles a teacher in a diverse world is enthusiastic about their responsibility to teach all students in the most effective way.

▪ What is the biggest challenge you faced?

Our biggest challenge is to convince parents to send their children to a young institution. A lot of our times as founders of Sanskriti University were spent in evangelizing to parents. All of us put our credibility on the line. A second challenge is to attract and retain high quality faculty. In most institutions in India, students are treated like non entities, but at Sanskriti University we are very strict about faculty selection, all our teachers are highly qualified and dedicated. We believe in value based education which helps students to become a better person and do something constructive for the society. At Sanskriti University students get the promise of world class education.

▪ What role the Infrastructure of an institution play in its growth?

Institutions and infrastructure systems are expressions of the ways by which a socioeconomic system organizes itself and its relations to its environment. As a consequence, changes in institutions and infrastructure affect a society's ability to achieve socioeconomic and environmental sustainability.

▪ How do we transform higher education in India?

We have to start by creating a tiered structure for institutions. Apart from institutions of excellence for those who wish to learn, research and specialize, we need a second rung of institution that feeds the economy like the booming IT, Retail, Banking, Agriculture, Health sectors, etc. Each of these tiers needs to be governed differently.
