

CONCEPT

Integral Humanism, a term coined by Pandit Deen Dayal Upadhyaya ji, is an outlook that offers potent solutions for national and international political, social, and economic development. It places the human being at the centre of social, political, and economic models and offers a non-dualistic lens through which to view the world we live in and act on the fundamental unity of humanity.

India had to rely on other nations for its armaments in the 1965 Indo-Pak war. At the time, Deendayal Ji had stated that we needed to create an independent India that was self-sufficient not only in agriculture but also in defence and weaponry.

Atma Nirbhar Bharat is now serving as a vehicle for securing the future of the village's impoverished, farmers, labourers, and middle class.

Deen Dayal Upadhyay's vision for the local economy serves as evidence of how forward-thinking and thorough his ideas were even at the time. With the motto "Vocal for Local" today, the nation is achieving his objective.

During COVID-19, the nation showed the spirit of Antyodaya and showed concern for the underprivileged. The nation has used the strength of Atma Nirbhar campaign to develop and produce indigenous Covid Vaccines which benefitted billions of people, and demonstrated the validity of the Integral Humanism Philosophy.
